

FARUKH AYAZ (Mern Stack Developer)

PROFILE SUMMARY

Dedicated and detail-oriented IT Support & Development with strong knowledge of computer systems, networking fundamentals, and troubleshooting techniques. Skilled in providing technical assistance, diagnosing hardware and software issues, and ensuring smooth IT operations across desktop, network, and server environments. Proficient in Windows systems, network monitoring, user support, and system maintenance. Demonstrates excellent problemsolving abilities, communication skills, and a customer-focused approach to resolving IT challenges. Highly motivated and detail-oriented Full Stack Developer with strong knowledge in designing, developing, and deploying scalable web applications. Proficient in both front-end and back-end technologies, including HTML, CSS, JavaScript, React.js, Node.js, Express.js, and databases such as MySQL and MongoDB. Experienced in building RESTful APIs, integrating third-party services, and managing version control using Git and GitHub. Skilled in responsive UI design, debugging, and performance optimization to ensure seamless user experiences. Eager to contribute technical expertise and grow within a dynamic and professional IT support team.

CORE SKILLS & COMPETENCIES

- Basic Understanding of Network & System
- Basic Network Configuration concept of (LAN, WAN)
- Basic Understanding of Cisco and Huawei Network Devices
- Network Cabling, Patch Panel, and Rack Management
- Strong Communication, Teamwork, and Problem-Solving Skills
- Front-End Development (HTML5, CSS3, JavaScript, React.js, Angular)
- Back-End Development (Node.js, Express.js, .NET, or Django)
- Database Management, MongoDB etc
- Version Control Systems (Git, GitHub, GitLab)
- UI/UX Implementation and Front-End Optimization
- Debugging, Testing, and Performance Optimization
- Strong Problem-Solving and Collaboration Skills

WORK EXPERIENCE

MERN Stack Developer (March 2025 – April 2026)

I worked as a MERN Stack Developer at “WebAcc Solutions”.

- Delivered scalable, production-ready web applications using MERN stack (MongoDB, Express.js, React.js, Node.js)
- Built and maintained RESTful APIs for seamless frontend–backend integration
- Developed scalable backend architecture focusing on performance, security, and maintainability
- Designed database schemas and optimized queries using MongoDB & Mongoose
- Built modern UI dashboards using React.js, Redux, and Tailwind CSS
- Managed VPS deployment, server configuration, and Nginx for high availability
- Implemented secure authentication systems using JWT and bcrypt
- Used Git/GitHub for version control and PM2 for process monitoring
- Set up and maintained CI/CD deployment workflows on cloud infrastructure
- Collaborated with designers, backend teams, and stakeholders to deliver client requirements
- Performed debugging, performance optimization, and production issue resolution
- Created technical documentation for APIs and deployed systems

MERN Stack Developer (September 2024 – March 2025)

I worked as a MERN Stack Developer at “RAPID X TECHNOLOGIES”.

- Worked as a full-stack MERN developer delivering end-to-end web solutions
- Developed RESTful APIs using Node.js and Express.js for scalable applications
- Built responsive dashboards and frontend interfaces using React.js, Redux, and Tailwind CSS
- Designed and managed MongoDB databases using Mongoose schemas
- Integrated secure authentication systems (JWT, bcrypt)
- Ensured consistent API–frontend data flow for production applications
- Handled deployment on VPS with Nginx and server optimization
- Used Git/GitHub for version control and team collaboration
- Performed debugging, testing, and performance tuning across applications
- Worked closely with designers and stakeholders for requirement implementation

MERN Stack Developer / Node.js Developer (March 2024 – June 2024)

I worked as a MERN Stack Developer at “Onestepcustomboxes”.

- Developed responsive frontend interfaces using React.js, HTML, CSS, and SASS
- Built reusable UI components for e-commerce web applications
- Integrated REST APIs and handled frontend-backend communication
- Assisted in backend logic using Node.js and Express.js (basic level)
- Improved UI/UX design consistency and responsiveness across devices
- Performed debugging and optimization for website performance
- Used Git for version control and collaboration
- Supported internal technical troubleshooting and system issues

Frontend Developer (April 2023 – May 2024)

I worked as a Frontend Developer at “WebWrite Inc.”.

- Worked as a full-stack MERN developer delivering end-to-end web solutions
- Developed RESTful APIs using Node.js and Express.js for scalable applications
- Built responsive dashboards and frontend interfaces using React.js, Redux, and Tailwind CSS
- Designed and managed MongoDB databases using Mongoose schemas
- Integrated secure authentication systems (JWT, bcrypt)
- Ensured consistent API–frontend data flow for production applications
- Handled deployment on VPS with Nginx and server optimization
- Used Git/GitHub for version control and team collaboration
- Performed debugging, testing, and performance tuning across applications
- Worked closely with designers and stakeholders for requirement implementation

Mern Stack Developer (August 2023 – November 2023)

I worked as a Mern Stack Developer at “Zoom IT Solutions Technology”.

- Worked as a Full-Stack MERN Developer delivering scalable end-to-end web applications
- Developed RESTful APIs using Node.js and Express.js for secure and high-performance backend systems
- Built responsive and dynamic user interfaces using React.js, Redux, and Tailwind CSS
- Designed and managed MongoDB databases with optimized Mongoose schemas
- Implemented secure authentication and authorization systems using JWT and bcrypt
- Ensured seamless integration between frontend and backend with proper data flow architecture

- Deployed applications on VPS servers with Nginx configuration and performance optimization
- Used Git/GitHub for version control and collaborative development workflow
- Performed debugging, testing, and performance improvements across applications
- Collaborated with designers and stakeholders to translate requirements into functional features

Frontend Developer (June 2022 – April 2023)

I worked as a Frontend Developer at “Vvork Cloud Technology”.

- Developed responsive and interactive user interfaces using React.js, Redux, and Tailwind CSS
- Converted UI/UX designs into clean, reusable, and production-ready frontend components
- Integrated RESTful APIs into frontend applications for dynamic data rendering
- Improved application performance, responsiveness, and cross-browser compatibility
- Worked closely with backend developers to ensure smooth API integration and data flow
- Implemented state management using Redux for scalable frontend architecture
- Optimized frontend code for speed, maintainability, and user experience
- Collaborated with designers and stakeholders to implement new features and UI improvements
- Used Git/GitHub for version control and team collaboration
- Performed debugging and UI testing to ensure stable releases

EDUCATION & CERTIFICATIONS

• **BSCS – Bachelor of Science in Computer Science (4-Year – Continue)** Virtual University of Pakistan

• **ICS – Intermediate in Computer Science**

Board of Intermediate and Secondary Education, Lahore

• **Matriculation (Science Group)**

Board of Secondary Education, Lahore

PROFESSIONAL CERTIFICATIONS

• **MERN Stack Development Certification**

Full-Stack Web Development (MongoDB, Express.js, React.js, Node.js)

Focus: REST APIs, Authentication, Database Design, Deployment, Scalable Web Applications

- **Frontend Development Certification**

React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS

Focus: UI/UX Development, Component-Based Architecture, API Integration

- **Juniper Networks Certified Associate (JNCIA)**

- **Cisco Networking Academy Certification**

- **CPA – Programming Essentials in C++**
